

# > FEELING AND BEING AT HOME IN UTRECHT

Utrecht. City in the heart' of the Netherlands. A popular city to live, study and work. People from all around the globe make their way to our city. It's popularity ensures that Utrecht will keep growing. Growth offers opportunities, but also puts the quality of life in the city under pressure. It is getting busier on the streets and the demand for facilities is increasing. This requires political choices. The VVD (People's Party for Freedom and Democracy) wants everyone to feel at home in Utrecht.

## **Utrecht will not get safer by itself**

The VVD wants to invest in road safety, clean neighbourhoods and more enforces. So that your children can go to school safely and you can safely walk the streets at night. We take a stand when our values are at stake. Only you decide who you love and in whom or what you believe.

## **Words don't built houses**

The city is growing and we need more housing to accommodate all new residents. We want affordable housing for everyone. We want to provide sufficient schools, sports facilities, shops and parks, where you can learn, exercise, shop, walk and play.

## **The best care and education**

In Utrecht you get the best care and the best education. If things turn out for the worst, we want the municipality to help you get back on your own feet. But we also expect that everyone makes a contribution. We encourage schools to provide the best education so that everyone can discover, develop and use their talents.

## **Jobs don't appear out of thin air**

The VVD would like everyone to participate in Utrecht. We do this by keeping the city accessible, creating new jobs and helping people who do not have work. By keeping local taxes low for residents and businesses, Utrecht remains an attractive city. We want to offer the To let them excel and to make new jobs possible. Entrepreneurship must pay off.
